

If you still haven't created a developer account, here is the link to get one for a one-time fee of \$25 <https://play.google.com/apps/publish/signup/>

Once you have the developer account, just follow this 10 minutes video:  
<https://youtu.be/vlusllp6YGE>

If you just follow it, there is no way to do it wrong. But of course, if you have any questions or if you need help please feel free to send me a message.

**IMPORTANT TIP about the Privacy policy field:** If you don't have a privacy policy, just copy/paste your website URL, or the URL from the contact page of the website, or FAQ, etc.

A screenshot of the Google Play Store 'Store Listing' page. On the left, a sidebar menu lists various options: 'Manage Releases', 'Store Listing' (highlighted with a red box), 'Experiments', 'Content Rating', 'Pricing & Distribution', 'In-app Products', and 'Services & APIs'. The main content area is titled 'Phone' and contains a 'PRIVACY POLICY' section. This section includes the text: 'If you wish to provide a privacy policy URL for this application, please enter it below. Also, please check out our User Data policy to avoid common violations.' Below this text is a 'Privacy Policy' label and a text input field, which is highlighted with a red box. A red arrow points from the 'Store Listing' menu item to this input field. At the bottom of the 'Privacy Policy' section, there is a checkbox labeled 'Not submitting a privacy policy URL at this time. Learn more'.

Best regards,

Nace
